

Welcome!

This document is meant to help you submit a complete application, which will increase your chances of receiving funding from Freedonia. There are two levels of funding available:

1. Small Grants (\$1,000 - \$8,000)
2. Large Grants (\$8,001 - \$20,000)

The application process for these two grants is similar, but there are a few key differences so please make sure that you are filling the correct application. For both levels of funding, a completed grant application consists of three parts:

1. The application that corresponds to the level of funding requested (fillable pdf)
2. A budget (excel sheet)
3. A project plan & timeline (excel sheet)

The applications are in fillable pdf form. You can open the document, type in your answers, and save it. Please ensure you are emailing us the completed, saved version. All three of these documents must be submitted together to complete your application. Completed applications can be emailed to freedonia@protonmail.com.

The more money you are requesting from Freedonia, the more detail we need to see outlined in these documents. Keep in mind that our assessment is partially based on whether you have demonstrated a level of organization and planning that is likely to result in your project's success. An application for \$15,000 that does not detail and justify very carefully how and why the money will be used is not likely to be successful.

A Note: if your computer has a Linux operating system, you may need to open the application form in Firefox to correctly fill and save it.

Please do not hesitate to reach out with any further questions.

In solidarity,
The Freedonia Board
